Acquiring GPS Satellite Signals

Before you can use GPS navigation features, you must acquire satellite signals.

When you turn on your navigation device, the GPS receiver must collect satellite data and establish the current location. The time required to acquire satellite signals varies based on several factors, including how far you are from the location where you last used your navigation device, whether you have a clear view of the sky, and how long it has been since you last used your navigation device. The first time you turn on your navigation device, it may take several minutes to acquire satellite signals.

- 1 Turn on the device.
- 2 Wait while the device locates satellites.
It may take up to 60 seconds to acquire satellite signals.
- 3 If necessary, go to an open area, away from tall buildings and trees.

Location

You can view your current GPS location, speed, course, elevation, and accuracy. You can also send a message with your location details from the location page.

Viewing and Sharing Your Current Location

- 1 Select **Location** to view your GPS location details.
- 2 If necessary, select **Share Location** to send a message with your location details.

Navigating with the Compass

- 1 Begin navigating to a destination.
NOTE: When you begin navigating, your friends and family can follow your progress and view your destination on your MapShare web page.
- 2 Select **Compass**.
- 3 Turn until the heading pointer aligns with the bearing pointer, and continue moving in that direction to the destination.

Stopping Navigation

Select **Compass** >  > **Stop Navigating**.

Using navigation functions

Trip Info

The trip info displays your trip time, time moving, maximum speed, average speed, trip distance, and trip odometer.

Resetting the Trip Info

For accurate information, you should reset the trip info before beginning a trip.

- 1 Select **Trip Info > Reset**.
- 2 Select an option:
 - To clear trip information such as times, distance, and speeds, select **Reset Trip**.
 - To clear trip information and reset the odometer, select **Reset All**.

Routes

A route is a sequence of locations that leads you to your final destination. You can create and save routes at inreach.garmin.com.

Navigating a Saved Route

Starting navigation updates your MapShare web page, and your friends and family can view the route you are navigating.

- 1 Select **Routes**.
- 2 Select a route.
- 3 Select **Navigate**.

Viewing a Route on the Map

- 1 Select **Routes**.
- 2 Select a route.
- 3 Select  > **View on Map**.

Reversing a Route

You can switch the start and end points of your route to navigate the route in reverse.

- 1 Select **Routes**.
- 2 Select a route.
- 3 Select  > **Reverse Route**.

Deleting a Route

- 1 Select **Routes**.
- 2 Select a route.
- 3 Select  > **Delete**.

Waypoints

Waypoints are locations you record and store in the device. Waypoints can mark where you are, where you are going, or where you have been. Creating or editing a waypoint updates your MapShare web page.

Creating a Waypoint

You can save your current location as a waypoint.

- 1 Select **Waypoints > New Waypoint**.
- 2 If necessary, edit the waypoint information.

Navigating to a Waypoint

- 1 Select **Waypoints**.
- 2 Select a waypoint.
- 3 Select **Navigate**.

Editing a Waypoint

- 1 Select **Waypoints**.
- 2 Select a waypoint.
- 3 Select an item to edit, such as the name.
- 4 Enter the new information.

Viewing a Waypoint on the Map

- 1 Select **Waypoints**.
- 2 Select a waypoint.
- 3 Select  > **View on Map**.

Deleting a Waypoint

- 1 Select **Waypoints**.
- 2 Select a waypoint.
- 3 Select  > **Delete**.

Using navigation functions

Map

The map page shows your location, sent and received messages, waypoints, and a colored track line connecting your track points. The inReach Explorer+ map shows streets, points of interest, and topographical information.

You can customize the information displayed on the map ([Map Settings](#), page 6).

Navigating with the Map

NOTE: Your device uses direct routing, and it does not create routes on roads.

- 1 Begin navigating to a destination.
- 2 Select **Map**.
 - 📍 represents your location on the map. Your route is marked with a colored line.
- 3 Complete one or more actions:
 - To view different areas, select 🌐.
 - To zoom in and out of the map, select **+** and **-**.

Sending a Reference Point

You can send a message that includes a reference point with details about another location. This feature is helpful if you want to meet someone at that location.

- 1 Select **Map**.
- 2 Select a location on the map.
- 3 Select **Send Reference Point > Continue**.
- 4 Enter your recipients and message.

Compass

The compass features and appearance change depending on whether you are tracking or navigating to a destination.

①	Heading pointer	Indicates your directional heading.
②	Bearing pointer	Points in the direction of your destination.
③	Elevation or destination	Indicates your elevation. When navigating, indicates your destination name.
④	Course, bearing, or heading	Indicates your course when you are moving. When navigating, indicates your bearing. On inReach Explorer+ devices, indicates your heading when you are not moving.
⑤	Distance	When tracking, indicates the distance traveled since you started tracking. When navigating, indicates the distance to your destination.
⑥	Speed	Indicates your speed.
